SPARK ROBOTICS

SPONSOR US

SPONSORSHIP LEVELS

Spark Robotics is a new, student run robotics team comprised of High School Students in Westport, CT. Although this is our first year as a team, many members have previous robotics experience. We run outreach events such as a scrimmage fundraiser for our program in Haiti and girls engineering workshops, and compete in New York City, New York Hudson Valley and Connecticut. Sponsor us for the 2017-18 season! Your sponsorship will help us defray costs for robot parts, outreach events, competition registration and possible travel! As a sponsor, your company logo can appear on our robot, team attire, tournament display booth (displayed at all events and in extensive media coverage) as well as our website and Facebook page.
